Get-together is inception. Solidarity is progress. Collaboration is success.

To Whom It May Concern:

Your longstanding partners PKI GmbH und DFC® GmbH merged on 01.09.2011 and have become

PKI-DFC® Premium Surface Technologies GmbH

From early September 2011 on PKI Preusser Kunststoff- und Industrielackierung (Plastics and Industry Coating) GmbH und DFC® Decorative Film Coating GmbH, the technology experts for surface decorations as well as upgrading and protective varnishings and coatings, transitioned from a masterful cooperation into the perfect symbiosis.

The highlight: Thereby we provide our customers with a secure base for the future, upon which exceptional ideas and individual customer wishes can be built. Especially solid partnerships are another important element with us and herewith we create an inexhaustible pool of competence based on human and professional knowledge.

Benefit from it!

- You savour even more security with cost control and scheduling.
- You gain practical support with detailed planning and services full of ideas according to your wishes and demands.
- You have the security of a comprehensive consulting and an object-accompanying support.
- You count on a frank and honest collaboration at every service stage.
- You quickly see how your expectations towards service, quality management and economical advantages will be even exceeded.

You will notice how our fusion builds the beginning of a progressive togetherness for a successful collaboration!

Our symbiosis is the step into a secure future, which we want to tread together with you.

Sincerely yours
